

TARGET RANGE DEVELOPMENT & OPERATIONS

Wildlife Restoration funds (manufacturer's excise taxes) generated from the sale of firearms, ammunition, and archery equipment, support the construction, operation, and maintenance of over 800 public target ranges in the United States. This represents a significant investment in safe, structured environments where the public may participate in all kinds of target shooting.

Recent Status

In the last six months, there are **12** new ranges being built as well as **135** ranges being upgraded or expanded.

Wildlife Restoration Grant Examples:

Discover how federal funding can help state fish and wildlife agencies construct firearms and archery target shooting ranges through the Wildlife Restoration Act. Ohio Division of Wildlife offers five firearms range examples, while Alabama Department of Conservation and Natural Resources presents three archery range examples.

Firearms Target Range Grant Examples (Ohio)

Archery Target Range Grant Examples (Alabama)

OH Feel at home on the range.

Thanks for supporting conservation in Ohio. Wildlife Restoration funds from manufacturers' excise taxes on your ammunition, firearms, and archery equipment have allowed our state to acquire land, complete construction projects, and expand accessibility. These funds also give Ohio additional resources for hunter education, wildlife research, and new facilities to pursue your passions and hone your skills. Because you're at the target range today, you're ensuring that the outdoor activities you love now will be enjoyed for generations to come.

Wildlife Restoration funding supports more than 700 target shooting ranges across the United States. Scan the code at right to learn more.

ARE YOU AIMING FOR A NEW EXPERIENCE?

ALABAMA'S PUBLIC RANGES ARE HERE FOR YOU!

Your purchase of a hunting or fishing license supports conservation in Alabama. Wildlife Restoration funds from taxes on firearms, ammunition, and archery equipment have allowed our state to acquire land, manage habitat, and expand accessibility. Because you're at the range today, you're ensuring that the outdoor activities you love now will be enjoyed for generations to come.

THE STATE BUILDS PUBLIC RANGES

The Wildlife Restoration program currently funds more than 100 target shooting ranges across the United States. Scan the code at right to learn more.

Thank you to the manufacturers of firearms, ammunition, and archery equipment who make this opportunity possible.

Sources for Matching Funding

MidwayUSA Foundation's Range Development Grants

While the Range Development grants are meant for MidwayUSA Foundation Team and Agency endowment holders, certain non-endowment organizations such as conservation groups and universities may apply. Such applications must directly benefit local youth shooting teams, thus enabling greater youth involvement in shooting sports.

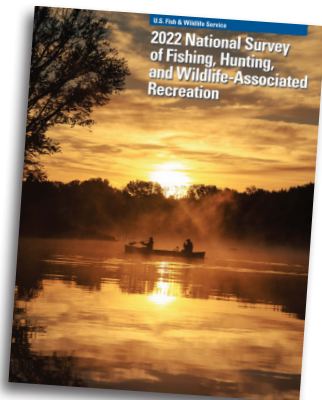

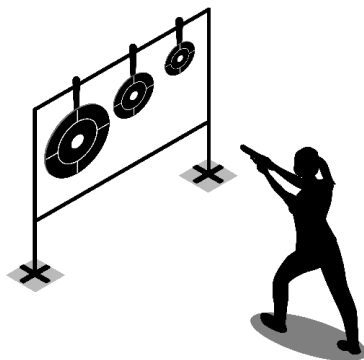

NRA Public Range Grant Funding

This matching grant program encourages city and county governments, and state or federal agencies, to work with the NRA to build and improve public ranges. At the NRA's sole discretion, grants assist with the acquisition, development, and improvement of public shooting facilities. Grants also assist qualifying agencies or governments with projects designed to improve community relations and to address environmental issues related to range operations.

NRA Foundation State Fund Capital Improvement Grants

The NRA Foundation is a 501(c)(3) charitable organization. As such, funded projects must promote an allowable 501(c)(3) purpose. If your range is owned by a government agency or is incorporated as a nonprofit entity or has an IRS 501(c) Determination Letter, your range may qualify for the grant.

Range Spotlight

The Headquarters Archery Range

Frankfort, KY

Opened to the public in 2023, the Headquarters Archery Range on the Kentucky Department of Fish and Wildlife Resources campus in Frankfort, Kentucky was completed with 11 shooting lanes and a raised platform to resemble shooting from a tree stand. Three of the lanes are made specifically for handicap accessibility. Target distances vary from 10 to 50 yards.
