

2024 Apportionment for the Sport Fish Restoration Act

The Sport Fish Restoration Act of 1950 placed a manufacturers' excise tax on fishing equipment and the 1984 Wallop-Breaux amendment captured a portion of the federal gasoline excise tax attributable to motorboats by a formula based on boat registrations. These funds are eligible to state and territorial fish and wildlife agencies for sport fish management and conservation, raising and stocking fish, habitat protection and enhancement, education, and constructing and maintaining fishing and boating access. This law is unique and is essential to the conservation, management and enhancement of sport fisheries and their habitats, and to provide angling and boating access in the United States for current and future generations.

What do these funds do?

Restore Fisheries

Sport Fish Restoration dollars helped move what was the nation's only federally endangered trout to threatened status, thus opening wilderness streams in New Mexico and Arizona to angling after a 50-year hiatus. Apportionments fund hatchery operations and population assessments, helping ensure the conservation of yellow and copper-colored trout.

Provide Public Access

Between 2014-2021, 319 new fishing and boating access sites have been constructed with excise tax funds. In total, more than 8,989 public boating and fishing areas are operated and maintained by Sport Fish Restoration funds.

Welcome New Anglers

850,000 people received fishing aquatic resourse education that was supported by excise tax funds between 2019-2021.

Raise and Stock Fish

Every year, 1 billion fish from 77 different species are produced by 321 state fish hatcheries across the country — all funded by Sport Fish Restoration grants using excise tax dollars.
