

# Wildlife Health and Disease Management

Federal excise taxes paid by manufacturers and importers of firearms, ammunition, archery, and angling equipment via the Pittman-Robertson and Dingell-Johnson Acts fund wildlife and fish health research laboratories, support health monitoring field work, disease surveillance, and support many disease and health projects. These projects funded across our Nation support the continuation of sustainable species management and healthy populations. Thanks to our partners, fish and wildlife health has remained a top priority, nationwide.

## Pittman-Roberston

**138**  
*grants*

monitoring diseases  
between 2021-2023

**\$66**  
*million*

total disease focused  
funding in 2021-2023

**38**

*laboratories*  
funded through PR  
between 2021-2023

## Dingell-Johnson

**53**  
*grants*

monitoring diseases  
between 2021-2023

**\$12**  
*million*

total disease focused  
funding in 2021-2023

**12**

*laboratories*  
funded through DJ  
between 2021-2023
